## HELP US HELP YOU

Read this guide carefully.

It is intended to help you operate and maintain your new water dispenser properly.

Keep it handy to answer your questions. If you don't understand something or you need more assistance, please call:

Avanti Customer Service  
800-220-5570

Keep proof of original purchase date (such as your sales slip) with this guide to establish the warranty period.

You'll find them on a label located on the back side of the unit.

Please write these numbers here:

\_\_\_\_\_  
Date of Purchase

\_\_\_\_\_  
Model Number

\_\_\_\_\_  
Serial Number

Use these numbers in any correspondence or service calls concerning your water dispenser.

If you received a damaged water dispenser, immediately contact the dealer (or builder) that sold you the water dispenser.

Save time and money. Before you call for service, check the Trouble Shooting Guide. It lists causes of minor operating problems that you can correct yourself.

Write down the model and serial numbers.

---

## IF YOU NEED SERVICE

We're proud of our service and want you to be pleased. If for some reason you are not happy with the service you receive, here are some steps to follow for further assistance.

FIRST, contact the people who serviced your appliance. Explain why you are not pleased. In most cases, this will solve the problem.

NEXT, if you are still not pleased, write all the details, including your telephone number, and send it to:

Customer Service  
Avanti Products  
10880 NW 30 Street  
Miami, FL 33172

## Important Safety Instructions

<b>⚡ WARNING ⚡</b>	To reduce the risk of fire, electrical shock, or injury when using your appliance, follow these basic precautions:
<ul style="list-style-type: none"><li>• Read all instructions before using the water dispenser.</li><li>• Never clean parts with flammable fluids. The fumes can create a fire hazard or explosion.</li><li>• Do not store or use gasoline or any other flammable vapors and liquids in the vicinity of this or any other water dispenser. The fumes can create a fire hazard or explosion</li><li>• Do not plug unit into receptacle until you ensure the water tank switches are off.</li></ul> <p>-Save these instructions-</p>	

### INSTALLATION GUIDELINES:

- Remove the exterior and interior packing.
- Place your appliance on a floor that is strong enough to support the dispenser when it is fully loaded. If it does not sit level on the floor, adjust the front right foot to level the unit well to the floor. Note: Only the front right foot is adjustable.
- Locate the appliance away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold ambient temperatures may also cause the appliance not to perform properly.
- Allow 2 inches of space between the water dispenser and the wall, which allows the proper air circulation to cool the compressor.
- Plug the appliance into an exclusive properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized Avanti Products service center.
- This water dispenser is not recommended for outdoor use.
- Do not locate the dispenser in area where the temperature may fall below freezing (32° F).
- Keep area around dispenser free of dust and dirt.
- Keep the reserve supply of water bottles away from excessive heat and light.
- Never unplug the water cooler, except for maintenance.

### OPERATION INSTRUCTIONS:

#### Before Using Your Water Dispenser

- Check to be sure the following parts are included:
  - 4 Extra Cup Dispenser Cabinet Plugs
  - Accessories Order Form.
- Before connecting the appliance to the power source, let it stand upright for approximately 2 hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.
- The water dispenser is pre-cleaned at the factory but the reservoir and water lines must be flushed with fresh water before use as follows:
  - Keep the unit unplugged.

- Fill water tank with tap water full to capacity (more than 3/4 of a gallon). Wait for 5 minutes until water settles.
- Press the room temperature water faucet until water comes out, then stop.
- Plug the dispenser into the electrical outlet. We are ready to complete the first cycle. In order to do that, wait for approximately 40 minutes for the cold water to reach its designed temperature.
- Unplug the dispenser from the electrical outlet. Proceed to drain the water from the faucets one at a time until no more water remains.  
(Note: To facilitate this operation, use a large container).
- Then, drain any water left in the tanks by opening both water faucets until it drains completely.
- Place the 3-5 gallon bottle of water on the water intake, allow water to stand for approximately one minute.
- Turn on water faucets to insure water flows from both faucets.
- Plug dispenser back into the electrical outlet.
- Now you are ready to use your water dispenser.

NOTE: Your water dispenser has been cleaned and sanitized before leaving the factory, but in case a taste problem develops, place one tablespoon of baking soda and add tap water. Fill water tank again and repeat basic operations previously outlined.

#### **⚡ WARNING ⚡**

IMPROPER USE OF THE GROUNDED PLUG CAN RESULT IN THE RISK OF ELECTRICAL SHOCK. IF THE POWER CORD IS DAMAGED, HAVE IT REPLACED BY AN AUTHORIZED AVANTI PRODUCTS SERVICE CENTER.

## **OPERATING YOUR WATER DISPENSER**

### **Electrical Connection**

This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with standard three prong wall outlets to minimize the possibility of electrical shock.

Plug the appliance into an exclusive properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized Avanti Products service center.

This appliance requires a standard 115/120-volt, 60Hz electrical outlet with three-prong ground.

The cord should be secured behind the appliance and not left exposed or dangling to prevent accidental injury.

Do not use an adapter plug with this appliance.

Do not use an extension cord with this appliance. If the power cord is too short, have a qualified electrician or service technician install an outlet near the appliance.

## **OPERATING YOUR WATER DISPENSER**

### **Steps to replace water bottles**

- Use a clean cloth to wipe off neck of bottle.
- Remove cap.

- Carefully lift bottle (approx. 40 lbs.) using your legs and not your back. Do not place hands on opening of bottle while placing in reservoir.
- Insert the water bottle on the water intake over reservoir opening so it settles properly on it.
- Wipe off any water which may have splashed on dispenser top.

#### **Cold Water Control**

Turn on the power switch at the back of the unit. The amber (cool) indicator will be lit and the process begins. When the water reaches the right temperature the amber (cool) light goes off and the green (cold) light turns on.

#### **Cup Dispenser (Optional)**

A cup dispenser may be installed by using the mounting holes (covered with plastic caps) located near the top of the right side panel of the cooler. The cup dispenser comes equipped with a mounting bracket and screws and may be ordered by completing the enclosed order form provided with your instruction manual.

### **CARE AND MAINTENANCE**

- Wash the inside of the reservoir with a warm water and baking soda solution. The solution should be about 2 tablespoons of baking soda to a quart of water.
- The drip tray and water faucets should be cleaned with mild detergent and warm water.
- At regular intervals or once a month inspect the coils located across the back of the dispenser. Vacuum accumulation of dust or clean it with a hard brush.

### **TAKING DISPENSER OUT OF SERVICE**

- If the water dispenser will not be used for a long period of time, unplug the power cord from the wall outlet.
- Drain the water through the faucets.
- Drain the water from the tanks by removing the plug from the water drain on the back of the dispenser.
- Unit should not be transported on the sides. Place it upright if possible and cover it with a blanket.

### **PROBLEMS WITH YOUR WATER DISPENSER?**

You can solve many common water dispenser problems easily, saving you the cost of a possible service call. Try the suggestions outlined below to see if you can solve the problem before calling the servicer.

### **TROUBLESHOOTING GUIDE**

<b>PROBLEM</b>	<b>POSSIBLE CAUSE</b>
Water dispenser does not operate.	Not plugged in. The circuit breaker tripped or a blown fuse.
Water cooler is not cold enough.	The water dispenser does not have the correct clearances.
Compressor turns on and off frequently.	The room temperature is hotter than normal. The temperature control is not set correctly. The water dispenser does not have the correct clearances.
Vibrations.	Check to assure that the water dispenser is level.

The water dispenser seems to make too much noise.	<p>The rattling noise may come from the flow of the refrigerant, which is normal.</p> <p>As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in your water dispenser.</p> <p>Contraction and expansion of the inside walls may cause popping and crackling noises.</p> <p>The water dispenser is not level.</p>

## **YOUR Avanti Products WARRANTY**

Staple your sales receipt here. Proof of original purchase date is needed to obtain service under warranty.

### **WHAT IS COVERED**

#### **LIMITED ONE-YEAR WARRANTY**

For one year from the date of purchase by the original owner, Avanti Products will, at its option, repair or replace any part of the appliance which proves to be defective in material or workmanship under normal use. During this period Avanti Products will provide all parts and labor necessary to correct such defects free of charge, so long as the appliance has been installed and operated in accordance with the written instructions in this manual. In rental or commercial use, the warranty period is 90 days.

#### **LIMITED SECOND THROUGH FIFTH YEAR WARRANTY**

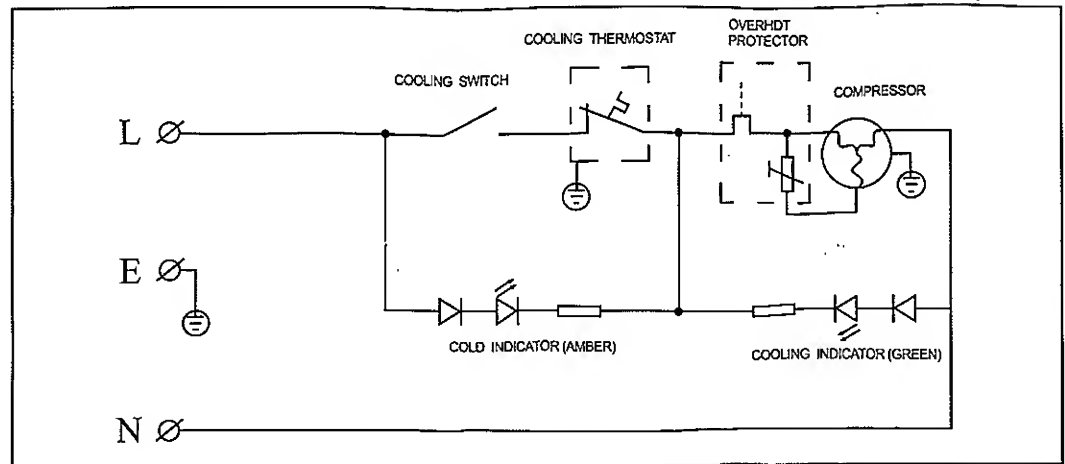

For the second through the fifth year from date of original purchase, Avanti Products will provide a replacement compressor free of charge due to a failure. You are responsible for the service labor and freight charges. In rental or commercial use, the limited compressor warranty is one year and nine months. Cost to move the appliance to the servicers' shop and back to the user's home, as may be required, are the users' responsibility.

---

### **WHAT IS NOT COVERED**

- Incidental or consequential damages.
- Parts and labor costs for the following will not be considered as warranty:
  - Punctured evaporator that voids the warranty on the complete sealed system.
  - Replacement of house fuses or resetting circuit breakers.
- Repairs performed by unauthorized servicers.
- Service calls that do not involve defects in material or workmanship such as customer education, door reversal, or improper installation.
- Service calls that are related to external problems, such as abuse, misuse, inadequate electrical power, accidents, fire, floods, or acts of God.
- Failure of the product if it is used for other than its intended purpose.
- This warranty does not apply outside the Continental U.S.A.

## WIRING DIAGRAM

## INSTRUCCIONES EN ESPAÑOL

### PASOS RECOMENDADOS PARA CAMBIAR EL BOTELLON

- quite el BOTELLON VACIO.
- LIMPIE EL CUELLO DEL BOTELLON NUEVO CON UN PAÑO LIMPIO.
- LEVANTE EL BOTELLON HACIENDO FUERZA CON LAS PIERNAS Y NO LA ESPALDA.
- TOME EL BOTELLON POR LOS LADOS Y DIRIJA EL CUELLO DEL MISMO HACIA LA APERTURA DEL TANQUE.
- VOLTEE EL BOTELLON COMO SI FUERA A SOLTAR AGUA E INSERTE EL CUELLO DEL BOTELLON EN LA APERTURA DEL TANQUE HASTA QUE SE COLOQUE EN LA POSICION CORRECTA.

### IMPORTANTE

CUANDO REEMPLACE EL BOTELLÓN, ABRA EL GRIFO DE AGUA CALIENTE Y ELIMINE NO MENOS DE 4 VASOS LLENOS DE AGUA PARA ASEGURAR EL PASO DE EL AGUA A TRAVES DE LA UNIDAD Y QUE EL NIVEL DEL AGUA LLEGUE AL NIVEL APROPIADO.

### DIRECCIONES BASICAS DE OPERACION:

- COLOQUE EL ENFRIADOR DE PIE POR UN PERIODO DE 2 HORAS ANTES DE ENCHUFAR LA UNIDAD A LA PARED.
- COLOQUE EL ENFRIADOR EN UN AREA BIEN VENTILADA Y DEJE UN ESPACIO DE UN POCO MAS DE 2 PULGADAS ENTRE LA UNIDAD Y LA PARED.
- ESCOJA UN LUGAR CON PISO NIVELADO.
- NO COLOQUE EL ENFRIADOR DONDE LA TEMPERATURA AMBIENTAL PUEDA BAJAR DE 32 °F (0 °C).

### ANTES DE ENCHUFARLO

AUNQUE ENFRIADOR SALE LIMPIO DE LA FABRICA, DEBE LIMPIAR Y ESTERILIZAR LOS CONDUCTOS DEL TANQUE Y LOS GRIFOS DE ACUERDO A LOS SIGUIENTES PASOS:

- LLENE EL TANQUE DE AGUA (HASTA EL TOPE) CON AGUA DE LA PILA.
- DEJE NIVELAR EL AGUA POR 5 MINUTOS.
- ABRA LA LLAVE DE AGUA CALIENTE HASTA QUE SALGA AGUA Y CIERRELA INMEDIATAMENTE.
- ENCHUFE LA UNIDAD A EL RECEPTACULO 120VAC EN LA PARED, ENCIENDA EL INTERRUPTOR SITUADO EN LA PARTE TRASERA DE LA UNIDAD, SIMULTANEMENTE EL INDICADOR DE AGUA FRIA SE ENCENDERÁ.
  - ESPERE APROXIMADAMENTE 25 MIN. HASTA QUE EL INDICADOR DE AGUA FRIA SE APAGUE. LA UNIDAD ESTA LISTA PARA SU USO.
- TOME EL BOTELLON DE AGUA Y SIGA LAS INSTRUCCIONES PARA CAMBIAR EL BOTELLON.
- ENCHUFE LA UNIDAD. AHORA SU ENFRIADOR ESTA LISTO PARA SU USO.

### CONTROLES DE OPERACION

- CONTROL DE AGUA FRIA:
  - ABRA LA LLAVE DE AGUA FRIA (10). EL INDICADOR DE LUZ VERDE SE ENCENDERÁ Y EL PROCESO DE ENFRIAMIENTO COMENZARÁ. CUANDO LA TEMPERATURA ALCANCE APROXIMADAMENTE 5-7°C LA LUZ VERDE SE APAGARÁ AUTOMATICAMENTE.

### MANTENIMIENTO

- A INTERVALOS REGULARES (UNA VEZ AL MES), INSPECCIONE EL CONDENSADOR O REJILLA DE ALAMBRE LOCALIZADA EN LA PARTE TRASERA DE LA UNIDAD.

- ANTES DE EFECTUAR LA LIMPIEZA, DESENCHUFE EL ENFRIADOR. USE UNA ASPIRADORA O UN CEPILLO DURO PARA QUITAR EL POLVO.
- PARA LIMPIAR LAS PARTES DE PLASTICO SE REQUIERE JABON LIQUIDO Y AGUA TIBIA. NO USE LIMPIADORES ABRASIVOS EN LA SUPERFICIE SUPERIOR NI EN LA BANDEJA DE ESCURRIMIENTO.

**SI NO VA A USAR EL ENFRIADOR POR UN TIEMPO PROLONGADO**

- DESENCHUFE LA UNIDAD.
- QUITA EL BOTELLON DE AGUA.
- EL ENFRIADOR DEBE TRANSPORTARSE PARADO Y CUBIERTO CON UNA FRAZADA PARA EVITAR QUE SE RAYE.

**CENTRO DE SERVICIOS**

LA MAYORIA DE LOS PROBLEMAS SE RESUELVEN CON UNA SIMPLE LLAMADA TELEFONICA A NUESTRO NUMERO SIN CARGO.

**1-800-220-5570**

ANTES DE DEVOLVER EL PRODUCTO O PARA OBTENER LA DIRECCION Y NUMERO DE TELEFONO DEL CENTRO DE SERVICIO MAS CERCANO LLAME AL SIGUIENTE NUMERO.

**1-800-220-5570**

**POSIBLES PROBLEMAS**

**CAUSA**

DERRAME DE AGUA POR FUERA DEL ENFRIADOR.	LA BOTELLA ESTA PERFORADA – REEMPLACELA.
EL AGUA NO ESTA SUFICIENTEMENTE FRIA.	SU TEMPERATURA DEBERIA SER DE 5° A 7° C CON UNA TEMPERATURA AMBIENTE DE 20° C. SI NO ES ASI, LLAME AL CENTRO DE SERVICIO, EL TERMOSTATO PODRIA ESTAR DEFECTUOSO.
EL ENFRIADOR NO ENFRIA EL AGUA.	VERIFIQUE LOS CIRCUITOS, FUSIBLES O DISYUNTORES.

**PRINTED IN CHINA**

(Accessories Order Form-Separate Page inside the manual)
